

Retail

Powerful, flexible,
omnichannel point of sale

Retail is a cloud-based commerce platform purpose-built for retailers.

Designed by retail veterans with over 100 years of collective experience, the software provides merchants with better control over sales and profitability by placing actionable real-time data in the hands of every person who needs it, from the C-Suite to the store floor.

With inventory management, unparalleled custom reporting, open API and portability across platforms and devices, Heartland Retail is easy to use, quick to start and applauded by its users for making their jobs easier.
